CROP 1941

NOVELTY and SPECIALTY
and
GENERAL
TRADE LIST

OF "CALIFORNIA'S CHOICEST
FLOWER SEEDS . . . SINCE 1890"

Prices in this list are effective at once for
all sales from 1941 crop during the remainder
of 1941 and the spring of 1942. A contract
list for 1942 crop will be issued
early in 1942.

Bodger Seeds, Ltd.
WHOLESALE FLOWER SEED GROWERS

LOS ANGELES COUNTY EL MONTE CALIFORNIA, U. S. A.

CABLE ADDRESS: Registered
"Bodger El Monte" All Codes

Printed in U.S.A.

Important Notice

This is not a contract list for 1942 crop. It is issued strictly as a spot list for orders covering 1941 crop. Many varieties and types are omitted from the list because of short crop, crop failure, or because we are already booked up to capacity and cannot accept further orders this season for this year's crop.

A list covering 1942 contract orders will be issued early in 1942, and we hope at that time to reinstate many of the varieties necessarily omitted now.

If not already covered for your needs for the spring of 1942, we cannot too strongly urge the placing of orders immediately as many items offered are already very short.

Terms and General Conditions of Delivery

ALL SEEDS are quoted F.O.B. El Monte, California, for delivery after harvest crop 1941, 60 days net, less 2% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable. There will be no charge made for bags smaller than the one pound size (5x7½ inches).

Prices quoted in this list go into effect immediately, superseding all previous quotations. All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate.

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

We give no warranty, express or implied, as to description, quality, purity, productiveness, or any other matter of any seeds we sell, and we will not be in any way responsible for the crop. If seeds are not accepted on these terms, they are to be held subject to our order.

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lock outs, fire, loss and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

Shipping Information

Domestic: Time is important. Many of our customers use the Air Mail exclusively to save time and get the most possible out of our rapid order filling and delivery service. We suggest that you do the same. If your order is sent to us by Air Mail from the east coast it arrives the second day, is filled the same day it arrives and if shipped by Parcel Post seed will reach you within seven days from the time the order left your office. Correspondingly less time is needed when shorter distances are covered. For faster delivery, seeds shipped by Air Mail or Air Express will reach you within four days from the time your order is

sent to us. For the greatest possible saving in time, send your order by wire to be shipped by air; seeds will arrive within two to three days from the time ordered.

Air express rates are calculated on the basis of half-pounds and distances are zoned. Air Mail is calculated on an ounce basis and goes as first class mail. Both speed up transportation immensely, and where time is a deciding factor, they certainly are the cheapest in the long run. Air transportation is safe, sure and economical.

Regarding rail shipments, both Parcel Post and Express will take 4 to 5 days to reach the east coast. When the shipment is over 10 pounds in weight it is cheaper to ship by express, but when it is less than 10 pounds, Parcel Post is cheaper. Parcel Post packages marked "Special Delivery" are given first class mail service and will go through practically as fast as first class matter.

Shipments of 75 pounds or over can be sent most economically by Freight. Package cars leave Los Angeles twice a week, arriving in Chicago the 7th morning and in New York the 10th morning. Contract orders and others placed considerably in advance of the time needed should be sent by Freight.

Foreign: We urge our foreign customers to use the Air Mails when sending rush orders. With the new Air Mail service across the Atlantic and the Pacific, there is a great saving in time, over and on both sides of the ocean. Air Mail letters are given preference over regular mail in all handlings.

When sending orders by cable, we suggest the use of our number code to cut down on words and expense. Five numbers in a unit may be sent for the cost of one word, a rate which reduces costs considerably.

Bodger Service Department

Novelties: The amateur gardener is novelty conscious, and it is easy to sell a new variety. Novelties are your logical sales leaders, and it is decidedly to your own advantage to make good use of them in your newspaper publicity, your advertising, and your counter features in the store. Make your selections from among the novelties listed herein and you cannot go wrong.

Transparencies: Our new colored transparencies are your busiest silent salesmen. They are accurately hand colored on translite film, printed from our regular photographic negatives. Placed in your store window, on the counter, along the walls with the seed racks, or near the cash register, they attract attention at once, and show your customer the actual flower of the seed you have for sale. Write us for full details regarding transparencies and the cabinets in which to display them.

Kodachromes: Our photographic department has recently assembled a very large collection of the small 35 millimeter Kodachrome slides which are available for the use of our customers for illustrating talks before garden clubs and other interested groups. If interested in the use of these Kodachrome slides, write us for full details and booking dates.

We are also equipped to photograph flower subjects in the larger professional size Kodachromes on order. We have a few 5" x 7" Kodachromes on hand at the present time. Write us if interested.

Bodger Service Department

Electros: Believing that the day has passed when any average seedsman can afford to devote a full page or even a half page of space in his catalog to one subject, with this average seedsman in mind we have made practically all of our new electros and nickeltypes in a small size this season so that six, eight or even more subjects can be shown on a page. We believe this size, particularly in the colored electros, will prove popular with retail seedsman. We call your particular attention to our inexpensive 1¾" x 2¼" color plates and to the large selection of new 1½" x 1½" black and white electros contained in this list.

All electros we send out are unmounted unless the order specifies that they be mounted. There is an additional charge of 20% for this service. Since a majority of our customers prefer unmounted electros we have followed this policy, but will be very glad to have them mounted for any who so request.

Photographs: Through our Photographic Service we are able to furnish you with a complete line of first class photographs of novelty and standard flower varieties suitable for publicity and catalog purposes. Photographs will be submitted for approval upon request.

Bulletins: The most ambitious effort of our Service Department is the publication of a series of bulletins on various flower subjects. Bulletin No. 1, *The Zinnia and Its Uses*, Bulletin No. 2, *Asters of Today*, and Bulletin No. 3, *Petunias, Past and Present*, have been distributed; if you have not received copies, write us and they will be forwarded promptly.

Horticultural Colour Chart: In certain sections of this catalog, we have added to the regular description of a variety some numbers and words in italics. These refer to color blocks in the Horticultural Colour Chart which many of our customers have secured either from us or from the Royal Horticultural Society direct. To visualize the exact color of the flower thus described, refer to your copy of the Colour Chart, turn to the page mentioned, mask the color block with the black mat provided and you will see the exact shade of the variety. For instance, Larkspur Stock Flowered Rosamond is described as *625 shaded 623*. These page numbers will be found in the upper right hand corner of each sheet in bold face type. *625* is the predominating color of the bloom with a shading of color *623*. Larkspur Stock Flowered Rose Queen, similar to Rosamond, is described as *623/1 and 623*. These two color tones will be found on page 623, block *623/1* being a slightly lighter tone of the full color *623*, both of which very similar colorings are found in this variety. We have been able to compile fairly complete color recordings of several flower varieties. We believe that by this method you will be able to visualize the colors of the several varieties much more vividly than any word description can do.

All-America Awards: Winners in the All-America Selections Competition are designated in this list by the following symbols: (G. M.) Gold Medal; (S. M.) Silver Medal; (B. M.) Bronze Medal; and (H. M.) Honorable Mention.

All-America award winners are among the finest flower varieties. We hope you are featuring as many of these All-America winners as possible.

Printed in U.S.A.

Important Notice

This is not a contract list for 1942 crop. It is issued strictly as a spot list for orders covering 1941 crop. Many varieties and types are omitted from the list because of short crop, crop failure, or because we are already booked up to capacity and cannot accept further orders this season for this year's crop.

A list covering 1942 contract orders will be issued early in 1942, and we hope at that time to reinstate many of the varieties necessarily omitted now.

If not already covered for your needs for the spring of 1942, we cannot too strongly urge the placing of orders immediately as many items offered are already very short.

Terms and General Conditions of Delivery

ALL SEEDS are quoted F.O.B. El Monte, California, for delivery after harvest crop 1941, 60 days net, less 2% cash 30 days. All invoices payable in U. S. dollars in or by New York or Los Angeles Exchange. All overdue accounts subject to sight draft without further notice.

Bags and containers will be charged at cost and are not returnable. There will be no charge made for bags smaller than the one pound size (5x7½ inches).

Prices quoted in this list go into effect immediately, superseding all previous quotations. All orders of 4 ounces or over will be charged at the pound rate; all orders under 4 ounces will be charged at the ounce rate.

We reserve the right to change any or all prices in this list without notice.

In case of crop shortages, orders will be filled pro rata only.

Crop failure or any cause beyond our control releases us entirely from delivery.

We give no warranty, express or implied, as to description, quality, purity, productiveness, or any other matter of any seeds we sell, and we will not be in any way responsible for the crop. If seeds are not accepted on these terms, they are to be held subject to our order.

Should fulfillment of any order or contract be prevented or delayed by the act of God, war, blockade, revolution, prohibition of exports or imports, riots, strikes, lock outs, fire, loss and/or detention at sea or any other contingency beyond our control, we shall not be responsible for any loss and/or damage thereby.

Shipping Information

Domestic: Time is important. Many of our customers use the Air Mail exclusively to save time and get the most possible out of our rapid order filling and delivery service. We suggest that you do the same. If your order is sent to us by Air Mail from the east coast it arrives the second day, is filled the same day it arrives and if shipped by Parcel Post seed will reach you within seven days from the time the order left your office. Correspondingly less time is needed when shorter distances are covered. For faster delivery, seeds shipped by Air Mail or Air Express will reach you within four days from the time your order is

sent to us. For the greatest possible saving in time, send your order by wire to be shipped by air; seeds will arrive within two to three days from the time ordered.

Air express rates are calculated on the basis of half-pounds and distances are zoned. Air Mail is calculated on an ounce basis and goes as first class mail. Both speed up transportation immensely, and where time is a deciding factor, they certainly are the cheapest in the long run. Air transportation is safe, sure and economical.

Regarding rail shipments, both Parcel Post and Express will take 4 to 5 days to reach the east coast. When the shipment is over 10 pounds in weight it is cheaper to ship by express, but when it is less than 10 pounds, Parcel Post is cheaper. Parcel Post packages marked "Special Delivery" are given first class mail service and will go through practically as fast as first class matter.

Shipments of 75 pounds or over can be sent most economically by Freight. Package cars leave Los Angeles twice a week, arriving in Chicago the 7th morning and in New York the 10th morning. Contract orders and others placed considerably in advance of the time needed should be sent by Freight.

Foreign: We urge our foreign customers to use the Air Mails when sending rush orders. With the new Air Mail service across the Atlantic and the Pacific, there is a great saving in time, over and on both sides of the ocean. Air Mail letters are given preference over regular mail in all handlings.

When sending orders by cable, we suggest the use of our number code to cut down on words and expense. Five numbers in a unit may be sent for the cost of one word, a rate which reduces costs considerably.

NOVELTIES AND SPECIALTIES

Nierembergia Purple Robe
No. 587—NICKELTYPES \$12.50

Nierembergia Purple Robe

(Bodger)

Bronze Medal

ALL-AMERICA SELECTIONS

1942

FEW FLOWERS of recent introduction have taken so quickly and thoroughly with the gardening public as the little dwarf Nierembergia Hippomanica. A very rare criticism of Hippomanica has, however, been the fact that it tends to fade to a very light unattractive color during the heat

of summer. To offset this criticism we are this year introducing Nierembergia Purple Robe, a very fine deep violet purple shade (35/1 & 34/1) of this very popular dwarf Nierembergia. Purple Robe maintains its deep color even in full sun and does not fade even in the hottest climate. The plant has a neat compact extremely free flowering habit, is only 6" tall, with a mature spread of some 10" to 12". A half-hardy perennial, Purple Robe blooms the first year from seed in about 15 weeks. As it is slow germinating, seed should be started in a flat or prepared seed bed where it can be properly tended during the 3 week period of germination. Purple Robe bids fair to become one of the most widely used and universally admired edging or rockery plants.

No. 5278 . . . Price per 1/4 oz., \$7.50 Per oz., \$25.00

Approximately 168,300 seeds per ounce.

Aster Wilt Resistant Princess Bonnie (Bodger)

OUR NEW Princess type Aster provides a needed new form for the cut flower grower. The blooms have a full, crested, powder-puff-like center surrounded by several rows of strong guard petals. Fine keepers and good shippers, the Princess Asters are no less effective when used as cut flowers from the home garden. Princess Bonnie, a lustrous new color combination in Asters, is a very beautiful soft salmon rose shade (625/2) with the center rich gold while opening. The large blooms are produced freely on strong stemmed plants which commence blooming in mid August. Bonnie, nearly 100% wilt resistant, has proved a great favorite both with the home gardener and the commercial grower.

No. 824 . . . Price per oz., \$.90 Per lb., \$10.00

Approximately 12,000 seeds per ounce.

Aster W. R. Princess Bonnie
No. 575—NICKELTYPES \$12.50

Cosmos Semi-Double Orange Ruffles
No. 581—NICKELTYPES \$12.50

Cosmos Semi-Double Orange Ruffles (Bodger)

A WORTHY companion to the justly popular Cosmos Orange Flare, our new Semi-Double Orange Ruffles brings new beauty and glamour to the Orange Cosmos tribe. Vivid and intense golden orange, the two or three extra rows of petals lend an airy butterfly-like beauty to the richly colored large blossoms. Extremely

free blooming, Orange Ruffles comes into flower ten days to two weeks earlier than Orange Flare, while the plants, slightly dwarfer in habit, have the same sparsity of foliage. The three to four foot plants will remain in full flower about six weeks without attention, or almost indefinitely if the older flowers are removed. Cosmos Orange Ruffles will add immensely to the beauty of any garden, and is the perfect subject to heighten the beauty of an edging row of Nierembergia Purple Robe.

No. 3290 . . . Price per oz., \$.90 Per lb., \$10.00

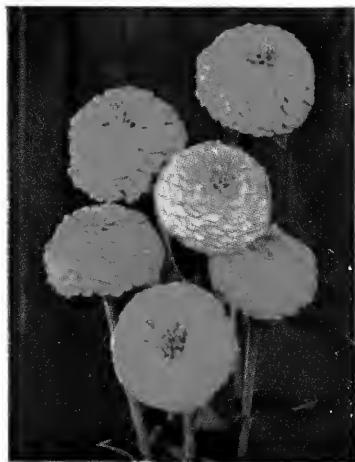

Approximately 3,000 seeds per ounce.

Zinnia Lilliput Pastel Mixture (Bodger)

WHEN WE think of flowers for cutting, our minds automatically turn to the pastel shades, in Zinnias as well as others. In the Pastel Mixture, we have incorporated the very lovely soft shades of apricot, peach, creamy yellow, shell pink, delicate salmon, light rose and orchid which are prime favorites with florists, cut flower growers and those who grow and arrange flowers for the home. Because of the neat compact symmetrical form of the Lilliput Zinnias together with their small size and stem length, they are particularly fine for cutting for bouquets in the home. The plants are twelve to eighteen inches in height, neat in habit, compact growing and very free blooming, producing flowers about 45 days after seed is sown. No garden is complete without a plot of these Pastel Lilliput Zinnias.

No. 1420 . . . Price per oz., \$.33 Per lb., \$3.50

Approximately 4,600 seeds per ounce.

Zinnia Lilliput Pastel Mixture
No. 579—NICKELTYPES \$12.50

Larkspur Giant Imperial Lilac King

(Bodger)

THE KING or Bodger type Larkspur is now well known to all wide awake seedsmen and gardeners. Lilac King will, therefore, be enthusiastically greeted as a welcome addition to the fast growing line-up in this fine type. It is a fine rich clear lilac shade, a color greatly in demand by the florist trade. The individual florets are fully double,

Larkspur Giant Imperial Lilac King

No. 585—NICKELTYPES \$12.50

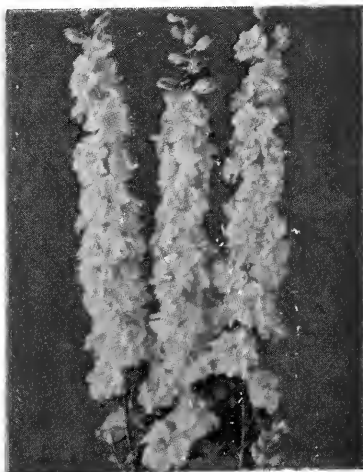

2" to 2 $\frac{1}{4}$ " in diameter with broad wavy edged petals, the individual florets closely spaced on 24" to 28" straight spikes. The plants, which are strictly basal branched and extremely upright in habit, give spikes which are ideal for cutting purposes. Lilac King, like other recent introductions in the King type, is very early blooming, robust and free flowering. As Larkspur seed is scarce this year, orders should be placed immediately to avoid disappointment. In growing Larkspurs, bear in mind that they are cool weather plants and for best results seed should be sown in the fall. In mild climates they are sown as early as August, while in cold climates good results have been obtained by a broadcast sowing in November, the seed remaining dormant until warm spring days start them growing. Lilac King grown in this manner will be a revelation in beauty.

No. 4522 Price per oz., \$.90 Per lb., \$10.00

Approximately 8,000 seeds per ounce.

Larkspur Giant Imperial Pink King (Bodger)

PINK KING has more than lived up to expectation held for it when introduced a year ago. The color, a lovely soft yet vibrant shade of salmon rose (625/2 & 625/1), is greatly in demand by cut flower growers. The fully double 2" florets, composed of rounded broad petals, are evenly and closely spaced on the stems giving that well known heavy Hollyhock-like cutting spike characteristic of the King type. Cutting spikes are 24" or more in length, the straight stiff stems coming from low on the plants which reach a height of five and a half feet. Beautiful in combination with Lilac King, Pink King is also a jewel on its own merits.

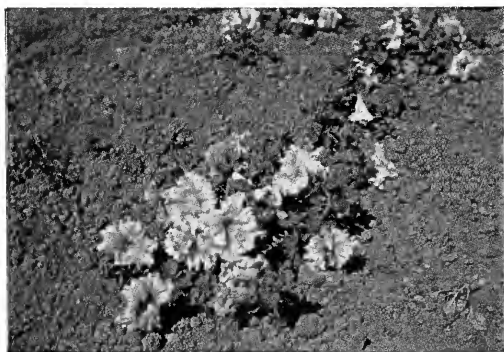

Larkspur Giant Imperial Pink King

No. 566—NICKELTYPES \$12.50

No. 4520 Price per oz., \$.55 Per lb., \$6.00

Approximately 8,000 seeds per ounce.

Petunia Giants of California Glamour
No. 588—NICKELTYPES \$12.50

Petunia Giants of California Glamour (Bodger)

Honorable Mention

ALL-AMERICA SELECTIONS

1942

EASILY the most striking Petunia we have ever grown, Glamour is truly a glamorous star in our galaxy of lovelies. Outstanding in its beautiful coloring, Glamour is a luscious shade

of salmon rose, delicately veined brown in the creamy open shallow throat. The blooms are extremely large, 5" to 6" in diameter, with a shallow open throat surrounded by satiny petals which are heavily ruffled. In the younger blooms the flowers appear double, but as the blossom matures the petals fall back in a wider radius leaving the beautifully veined throat exposed. The huge strikingly beautiful flowers are freely produced on strong growing richly foliaged plants which will be 1½' to 2' tall by the end of the season although the first flowers are produced when the plants are only 5" to 6" tall. Bringing an entirely new shade to this popular type of Petunia, Glamour has been enthusiastically admired by all who have seen it on our ranches or in trial plantings during this past season. As the demand has already been exceptionally heavy since announcement of A.A.S. awards, supplies are very low as we go to press and we expect to be entirely sold out in a very short time.

No. 5714 Price per 1/16 oz., \$3.50 Per ¼ oz., \$10.50 Per oz., \$35.00

Approximately 162,000 seeds per ounce.

Cynoglossum Amabile Dwarf Firmament

Bronze Medal **ALL-AMERICA SELECTIONS** **1939**

A DISTINCT improvement over the older Cynoglossum Amabile, Firmament during the two seasons it has been on the market has definitely proved its merit and earned a lasting place among the gardening "musts." Dwarf and compact growing, unusually free flowering, gay and colorful, the little Dwarf Firmament is indeed a gem for the summer garden. Preferring full sun and a warm climate, it brings to the summer garden that priceless touch of bright blue so rare among annuals.

No. 3184 Price per oz., \$.20

Per lb., \$2.00

Approximately 5,300 seeds per ounce.

Cynoglossum Dwarf Firmament
No. 582—NICKELTYPES \$12.50

Zinnia Striata The Clown
No. 577—NICKELTYPES \$12.50

Zinnia Striata **The Clown** (Bodger)

REMINISCENT of the gay and happy character for which it is named, The Clown is an amusing new Zinnia cheerily striped scarlet and gold—a new found jewel for the cutting garden, for the annual border and most especially for flower arrangements. The 2½" to 3" medium sized blooms are ideally suited for use in

the home, and because of the very free flowering character of the plants, are very colorful in the garden. The plants are freely branched, 2½' tall, bloom profusely, and like other Zinnias, the more flowers cut the more will be produced. Whether planted as a separate color block, or used in combination with other colors, The Clown will more than come up to expectations. As with most striped flower varieties, some variation will be found. Approximately 80% to 85%, however, will come true—striped scarlet and gold.

No. 1590 . . . Price per oz., \$.90 Per lb., \$10.00

Approximately 4,500 seeds per ounce.

Zinnia Striata Old Glory (Bodger)

WITH THE spirit of patriotism imbuing all gardeners, our new Zinnia Old Glory will certainly be a welcome addition to the patriotic section of the garden. Gaily striped red and white, this colorful newcomer is most effective in flower arrangements as well as being an interesting subject in the garden. The flowers are medium sized, 2½" to 3" in diameter, carried on plants which attain a height of approximately two and a half feet. Very early and extremely free blooming, Old Glory is one of the best cut-and-come-again Zinnias, producing generous quantities of blooms until frost if kept picked. Old Glory can be expected to produce about 75% true striped blooms.

No. 1588 . . . Price per oz., \$.90

Per lb., \$10.00

Approximately 4,500 seeds per ounce.

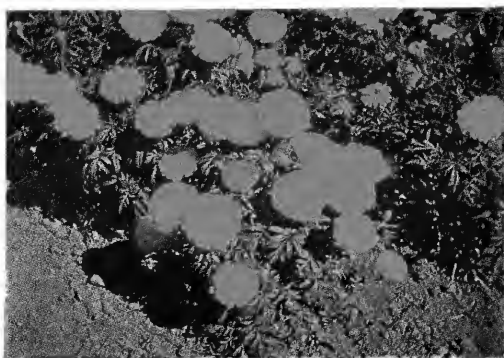

Zinnia Striata Old Glory
No. 576—NICKELTYPES \$12.50

Marigold Dwarf Gigantea Pot O'Gold

(Bodger)

POT O' GOLD, a mass of intense dazzling gold on dwarf compact growing plants, has everything it takes to produce a garden favorite: showiness, fragrance, exceptional size—and is early flowering as well. The 4" to 4½" flowers, of the Gigantea formation, somewhat loosely formed, very full centered with broad heavy petals gracefully overlapping, are freely borne on 12" to 15" well-branched neat compact plants, which are the first to bloom among large flowered Marigolds. One hundred per cent double, Pot O' Gold is maintaining its well-deserved popularity as a garden and cut flower subject for the home.

Marigold Dwarf Gigantea Pot O' Gold
No. 586—NICKELTYPES \$12.50

No. 5052 Price per oz., \$1.70 Per lb., \$20.00

Approximately 8,000 seeds per ounce.

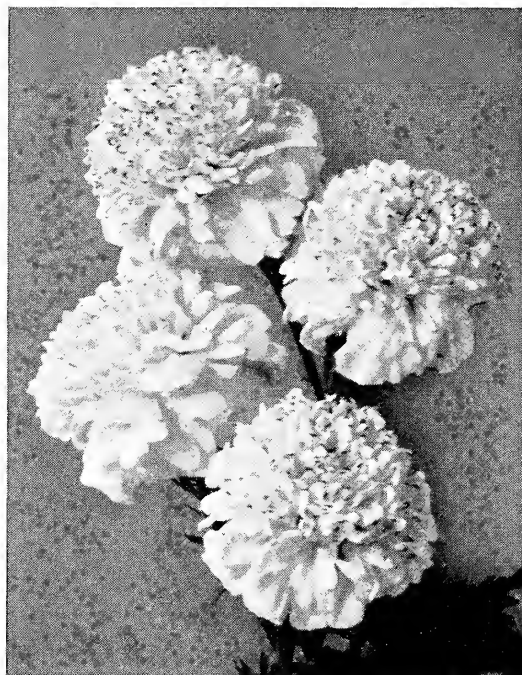

Marigold Dwarf French Harmony Type Butterball (Bodger)

Bronze Medal

1942

○ UR LATEST addition to the Harmony family of Marigolds, Butterball is an exquisite little jewel which bears dozens of flowers of a lovely soft butter

Marigold Dwarf Butterball
No. 1015—ELECTRO \$2.50

yellow shade. Much more dwarf and compact in habit than the original Harmony, Butterball might be classed a super dwarf strain in this fine group. The plants are 6" to 8" in height and literally covered with their 2" blooms of the characteristic Harmony formation—crested centers composed of dozens of dainty tubular petals, each carrying a touch of maroon at the tip, surrounded by several rows of broad velvety self colored butter yellow guard petals. Remarkably early blooming, Butterball produces a blanket of color for the border or garden bed during the many weeks of summer.

No. 5092 Price per oz., \$.70
Per lb., \$8.00

Approximately 10,000 seeds per ounce.

Helianthus Sun Gold
No. 583—NICKELTYPES \$12.50

Helianthus Sun Gold (Bodger)

DRAMATIC and striking in beauty, the double Sunflowers, although by no means new in the horticultural world, are surprisingly unknown to a great many garden enthusiasts. Because of this, seed dealers have a rare opportunity to bring unexpected pleasure to their garden customers with this easy-to-grow, inexpensive, fine

new strain of the double Sunflower, Sun Gold. One hundred per cent double, the brilliant golden yellow blooms which measure 4" to 5" in diameter are a delight in a background planting in full sun where they will produce a vivid splash of color in mid-summer. The plants, which reach a height of 4' to 5' depending on soil and climate, are very even in growth and are unusually free flowering.

No. 4182 . . . Price per oz., \$.20 Per lb., \$2.00

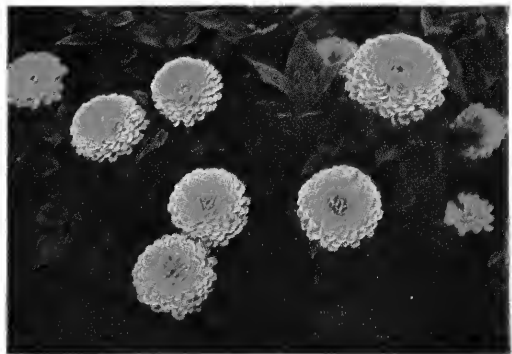

Approximately 900 seeds per ounce.

Zinnia Dahlia Flowered Exquisite (Bodger)

WHILE MANY new types and flower forms have recently been developed in the Zinnia family, don't overlook the old, long established garden favorites. They are more than maintaining their popularity. One of the leaders in the popularity poll of the old-timers is the very lovely Dahlia Flowered variety Exquisite. The large perfectly formed blooms are a gorgeous sight with their centers of deep Tyrian rose surrounded and heightened in beauty by the several outside rows of softer rose. Beautiful in the garden, Exquisite is truly an exquisite subject for flower arrangements also.

No. 1268 . . . Price per oz., \$.35
Per lb., \$3.50

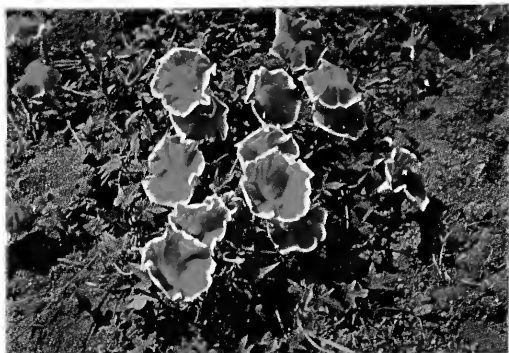

Approximately 2,800 seeds per ounce.

Zinnia Dahlia Flowered Exquisite
No. 578—NICKELTYPES \$12.50

Ipomea Cornell

THE LARGE brightly colored, white bordered, carnelian red trumpet-shaped flowers of lovely Ipomea Cornell are an excellent foil for Clarke's Heavenly Blue and our new White Magic Ipomeas. Free blooming with a heavy growth of attractive bright green foliage, Cornell is an excellent climber, is early blooming and its blossoms remain open well past mid day.

Ipomea Cornell

No. 584—NICKELTYPES \$12.50

No. 4388 Price per oz., \$.70 Per lb., \$8.00

Approximately 670 seeds per ounce.

Ipomea White Magic (Bodger)

ANY FENCE or trellis can be transformed to a magic bower with a planting of our new White Magic Ipomea, a very early blooming exceptionally free flowering white Ipomea, similar except in color to Clarke's Early Heavenly Blue. The large fleecy-white flowers blending to cream deep in the throat make a heavy cascade of blooms on a fence or trellis or garden wall. Selected originally from our planting of Clarke's Heavenly Blue, White Magic now is offered as a glowing companion and counterpart to Heavenly Blue and, for the patriotic touch, the red of Cornell is ideal.

No. 4354 Price per oz., \$1.10 Per lb., \$12.50

Approximately 675 seeds per ounce.

Centaurea Cyanus Double Blue Boy

Centaurea Cyanus Double Blue Boy

No. 580—NICKELTYPES \$12.50

A GREAT improvement over the older blue Bachelor Button, Blue Boy is an excellent fully double large flowered free flowering strain which any florist or home gardener would do well to use.

No. 2894 Price per oz., \$.20

Per lb., \$2.00

Approximately 7,000 seeds per ounce.

ASTERS *a*

LARGE FLOWERED, HEAVY STEMMED, SPECIAL FLORIST VARIETIES

EARLY GIANT WILT RESISTANT *f* (Bodger)

The finest large flowered, heavy stemmed wilt resistant Aster yet developed. Flowers are of the large Giants of California type, while the plants are less tall, about 1½' in height, with strong heavy stems. This class is early blooming, coming into flower four to six weeks earlier than the Giants of California, that is during early to mid August. An exceptional new class.

All small electros not otherwise marked, 85 cents each.

EARLY CALIFORNIA GIANT *f* (Bodger)

A new early blooming strain of the Giants of California Aster. The flower size and form are the same as in the later blooming group, while the plant habit resembles the Beauty class, with branching beginning rather high on the main stem, the flowers being borne erect. Blooming commences a week or more earlier than in the late class, or about the end of August under our conditions. We very highly recommend the new Early California Giant Asters for short season districts, or wherever a large flowered type is wanted early in the season.

ASTER WILT AND WILT RESISTANCE

The so-called wilt disease of Asters is caused by a specific parasitic fungus, which may attack the plant at any stage in its growth from the seedling to the seed-producing age. The spores of the fungus may be carried on Aster seed and on inert matter with the seed, on the implements used in preparing the soil, and in the soil itself. When once introduced into the soil, it persists indefinitely and makes the land “aster sick,” that is, whenever an ordinary strain of Asters is planted into that particular soil at any time thereafter, the wilt fungus living in it will attack the plants and they will die off at some stage of their growth.

A wilt resistant strain of Asters, however, is one which, although planted on the very sickest soil available, will withstand the attacks of the fungus and develop into strong, healthy plants. Just as some people or animals withstand the attacks of certain diseases, while others become sick at the first sign of an epidemic, so the resistant strains of Asters will withstand the attack of the wilt fungus, while the non-resistant strains will succumb.

See our Bulletin No. 2, Asters of Today, for full details on Aster diseases and culture.

ZINNIAS^{*a}

We have been Zinnia specialists for many years, taking the lead in their development ever since our first outstanding Zinnia introduction, the Dahlia Flowered strain, which was rightly named a New Flower for the People. This type, developed in our experimental department and introduced by us in 1919, was the turning point which changed completely the status of the once unpopular Zinnia family. Since this time, we have developed and introduced many new types and varieties in the now extremely popular Zinnia group. Many additional varieties are in the process of development in our Zinnia workshop and will be presented within the course of the next few years. See our Bulletin No. 1, The Zinnia and its Uses, for full details on Zinnia Types and Culture.

TALL, LARGE FLOWERED TYPES

BODGER'S GOLD MEDAL DAHLIA FLOWERED *f* (Bodger) (G.M., R.H.S. '24)

The Dahlia Flowered strain was introduced by us in 1919, and all the colors have been of our introduction at various times since then.

The plants are of medium height, 2½'-3', very robust, bearing many strong stems of the fully double, huge flowers which resemble the show type of Dahlia. We have marked the most popular varieties with an asterisk (*).

BODGER'S CALIFORNIA GIANT or MAMMOTH f (Bodger)

Introduced by us in 1926, this type has rapidly gained in popularity. The plants are taller than the Dahlia Flowered type, 3'-4', with long stems which adapt it particularly for use as a cut flower. The flowers are very large and flat, giving a graceful effect.

		Per oz.	Per lb.

DELPHINIUM PACIFIC GIANTS *pf* (Vetterle and Reinelt)

Remarkable new strain developed by Vetterle and Reinelt on the Pacific Coast. Flowers extremely large and well formed, 2½" to 3½" in diameter, symmetrically spaced on well balanced spikes of thin woody stems, practically 100 per cent double. This strain is comparatively mildew resistant. Seed we have to offer is of our own growing produced from the originator's stock seed.

POPPIES—IMPORTANT ANNOUNCEMENT

According to a recent ruling of the Federal Narcotics Department it is illegal to have in one's possession plants from which opiates may be extracted. These plants include the various strains of *Papaver somniferum*; in other words, Poppy Carnation Flowered, Paeony Flowered, Cardinal and Tall Single Annual.

After the Federal authorities had made several tests of the aforementioned Poppies growing in our fields it was ascertained that opiates were present in the sap of these different Poppies. At the suggestion, therefore, of the Federal and State authorities we have plowed under or cut and destroyed all plants of these several poppy types. We have also destroyed such seed as we had on hand and in the future will be unable to supply any seed whatever of the Carnation Flowered, Paoney Flowered, Cardinal type and Tall Single Annual Poppies. Since it is illegal to grow these plants, all seed dealers would do well to remove these varieties from their lists in future.

It is with regret that we make this announcement since these poppies have long been among the popular garden varieties, but we feel sure all will agree that under the circumstances strict adherence to the provisions of this law is mandatory for the best interests of all.

BRIEF CULTURAL NOTES

ZINNIAS: Zinnias are warm weather loving plants and should never be sown until the soil has thoroughly warmed up and all danger of any frost has passed. For best results, especially with the smaller flowered, early blooming varieties, we recommend sowing the seed where the plants are to flower. The taller growing, large flowered sorts can safely be transplanted, although they also will make a more robust growth and will produce more flowers if they can be sown where the plants are to bloom, and then when the seedlings are 3" or 4" tall, thinned to the proper distance. To induce a thrifty, heavy root system, irrigate your plants rather than sprinkling. Dig a little trench alongside the row and let the water run slowly for several hours so it will seep down deep into the ground and make the food in the soil available for the plant throughout the mass of feeding roots. Always cultivate after each irrigation to conserve moisture. By this method you will have to water Zinnias only once every two weeks or so, whereas if the ground is merely sprinkled, you will have to repeat the sprinkling every other day or so. Irrigation not only gives a stronger, healthier plant, but also saves on your water bill.

CALENDULAS: Calendulas are definitely cool weather loving plants and in the warmer climates should be sown in the autumn for early bloom in the late winter or early spring. While they like full sun, they cannot stand the burning sun of summer. In colder climates, seed should be started in the cold frame and plants set out as soon as possible for late spring and early summer bloom. In planting Calendulas, be sure and choose the proper type for the use you have in mind. There are forcing varieties for greenhouse growing and garden varieties for outdoor growing. The outdoor varieties make a sturdier, more compact growth and are very desirable for garden use, while the forcing varieties are developed especially for the cut flower trade and do best under greenhouse conditions.

GODETIAS: In their native California, the Godetia seeds on the hillsides sprout with the first winter rains and grow during the cool, wet winter months and come into flower during late spring, hence their name, Farewell-to-Spring. Given similar treatment in the garden, they will give their best bloom. Sow the seed broadcast late in the fall and allow them to remain undisturbed during the winter months. In the spring they will grow quickly as the soil warms and bloom profusely during late spring. Best results will be obtained by this method as they cannot tolerate the very strong summer sun.

GOURDS: Gourds should be sown where the plants are to remain and should not be planted until late in the spring after the soil is thoroughly warm and nights as well as days are warm. For best results sow in a warm, sandy location, somewhat on the dry side. Provide enough water for a normal growth until the flowers appear, after which no further irrigation should be necessary. Watering during the flowering period will cause dropping of flowers and buds, and consequent loss of Gourds. For perfect-shape specimens, vines should be trained up on a fence or trellis and the Gourds allowed to hang, thus assuring straight necks and preventing rotting or discoloration from the soil. Do not harvest the Gourd crop until the fruits are thoroughly matured. This will be when the stem becomes brown and hard and pressure with the fingernail cannot dent the shell of the Gourd. After picking, Gourds should be hung in an airy, dry place until thoroughly cured. The large, hard-shelled varieties are then washed and scrubbed before decorating. The small, colorful varieties are wiped clean of dust and given a light coating of varnish or shellac. If thoroughly dried before treatment, Gourds should last several months for house decoration.

IPOMEAS: In growing Ipomeas, never plant until the soil is thoroughly warm. If it is too cool, the seeds will rot instead of germinating. Even in such warm sections as Southern California, seed should not be sown until late May. To aid germination of particularly hard-seeded varieties, filing a small notch at the top of the seed will help considerably. Always select the driest, sandiest part of the garden and sow where the plants are to flower as the Ipomeas resent transplanting. Plants should be kept on the dry side in order to induce early and abundant flowering with a rather sparse growth of foliage. Heavy watering will stimulate foliage growth at the expense of flowers. A poor soil is preferable to a rich one and fertilizer should not be used as this will promote heavy foliage which will hide the flowers. Ipomeas show off to best advantage when planted against a wall, fence or trellis.

BRIEF CULTURAL NOTES (Continued)

LARKSPURS: Larkspurs are cool weather plants and for best results should be sown in the fall. In warm sections, such as Southern California, they are sown as early as August, broadcast where they are to bloom and if for the cut flower market, are sown thick like radishes and the entire plant pulled to go to market. For the home garden, on the other hand, plants are thinned out to the proper distance and allowed to branch normally for a more brilliant show of color. In the colder sections, seed should be sown broadcast in November in its permanent position in the garden. If very severe, a light mulch covering should be applied. Seed will, therefore, remain stratified and dormant throughout the winter months and with the spring thaws and first warmth will germinate and commence to grow. As Larkspur seed requires a chilling for best germination, this is the ideal treatment for best results.

MARIGOLDS: The African Marigolds are strong feeders requiring plenty of water. This type should therefore be planted in the richest, most favorable section of the garden. Seed may either be sown where the plants are to flower or can be started early in a seed bed and the seedlings set out to their permanent position later on. They transplant very readily. French Marigolds on the other hand are very light feeders and require a very small quantity of water. Too strong feeding and too heavy watering will throw them into foliage growth with a great scarcity of flowers. For a free-flowering, colorful plant, select the poorest soil, keep the plants on the dry side and do not fertilize. Seed may be sown where the plants are to flower or seedlings can be transplanted from the seed bed although better results will probably be obtained by sowing in place. Marigolds are fairly hardy and should be started early in the spring.

PETUNIAS: The chief pitfall the amateur runs up against in growing Petunias is in the seed sowing. Almost invariably they bury the tiny seeds so deeply that the sprouting seedlings cannot possibly fight their way to the surface. Petunia seed must be sown with the very utmost carefulness. A seed flat or a seed pan should be used, a light, loamy soil carefully prepared, properly moistened and finely screened, the box filled to within a half-inch of the top with ample drainage on the bottom and tamped down firmly, smoothly and evenly. Then the seed should be mixed with about a teaspoonful of sand and this mixture of seed and sand sprinkled carefully and thinly over the surface of the seed box. A very fine sprinkling of pure sand, not more than $\frac{1}{8}$ of an inch, may be used on top of this mixture or it may be left without any further covering. A pane of glass or a damp burlap sack or folded newspapers should then be placed over the flat and left there until the seeds begin to sprout. Immediately after the first sprout appears, this heavy shading must be removed and a single layer of gauze substituted. If the soil has been properly moistened when it is being prepared for sowing, it will not have to be watered again until the seedlings have developed their third and fourth leaves. If the soil appears to be drying out, however, water is to be applied with a very fine-spray hand bulb, or better still, the pan or flat placed in a tray of water to allow moisture to soak upwards from the bottom. Always leave the seed box in a well-ventilated place, but without any draft, to prevent damping off. When the seedlings are large enough to handle, they should be pricked off into a second flat or small pots for a few weeks before setting out in their permanent position in the garden.

SCABIOSAS: While the annual Scabiosas will bloom during the summer, they do so much better in the early spring than during the hot summer days, that every effort should be made to start the seed in the early fall in warm sections or in cold frames in early spring in the more northerly sections. In warm sections, such as Southern California, plants will winter over perfectly well and produce extremely early flowers the second year. Scabiosas enjoy full sun and will thrive in any good garden soil.

APPROXIMATE NUMBER OF SEEDS PER OUNCE

Abronia	2,300
Acroclinium	9,000
Ageratum Dwarf	214,000
Alyssum	60,000
Amaranthus	30,000
Anagallis	41,900
Anchusa Italica	1,200
Anemone	40,100
Antirrhinum	220,000
Aquilegia Longissima	17,500
Arctotis Hybrids Autumn Shades.....	9,000
Armeria Large Flowered Hybrids.....	12,000
Aster Varieties	12,000
Aster Wilt Resistant Early Giant Rose Marie.....	12,000
Aubrietia	85,000
Balloon Vine	400
Balsam Bush Flowered Torch.....	2,400
Bartonia	38,000
Bellis Perennis	192,000
Bidens	29,600
Brachycome	150,000
Calendula Campfire Bodger's Improved Fl. Strain.....	5,200
Calendula Chrysantha	4,000
Calliopsis	100,000
Campanula Medium	125,000
Candytuft	10,000
Canna	100
Carnation Chabaud's	15,000
Celosia	30,000
Centaurea Cyanus	7,000
Centaurea Gymnocarpa	7,500

SPECIAL USES OF FLOWERS FOR CUT FLOWERS

Acroclinium	Clarkia	Nigella
Agrostemma	Coreopsis	Pentstemon
Anchusa	Dianthus	Petunia
Antirrhinum	Didiscus	Phlox
Arctotis	Gaillardia	Poppy Nudicaule
Aster	Gerbera	Pyrethrum Roseum
Brachycome	Gomphrena	Rudbeckia
Cacalia	Gypsophila	Salpiglossis
Calendula	Helichrysum	Scabiosa
Calliopsis	Larkspur	Schizanthus
Candytuft	Marigold	Stocks
Carnation	Mignonette	Sweet Peas
Centaurea	Nasturtium (Gleam)	Verbena
Chrysanthemum		Zinnia

ANNUALS THAT DO WELL IN A SLIGHTLY MOIST SOIL

Amaranthus	Linum	Mignonette
Calendula	Marigold	Nigella
Larkspur	Marvel of Peru	Ricinus

ANNUALS WHICH WITHSTAND DROUGHT

Abronia	Coreopsis	Marvel of Peru
Ageratum	Cosmos	Mesembryanthemum
Alyssum	Cynoglossum	Petunia
Arctotis	Dianthus	Portulaca
Bartonia	Dimorphotheca	Scabiosa
Brachycome	Euphorbia	Statice
Browallia	Gaillardia	Tithonia
Calliopsis	Helianthus	Verbena
Candytuft	Hollyhock	Vinca
Centaurea	Humulus	Zinnia
Chorizanthe	Marigold	

PLANTS FOR HANGING BASKETS, ETC.

Abronia	Geranium	Nasturtium (Gleam)
Ageratum	Ipomea	Petunia
Asparagus sprengeri	Lantana	Portulaca
Begonia	Lobelia	Thunbergia
Coleus		Verbena

FLOWERS FOR WINTER BOUQUETS (DRIED FLOWERS)

Acroclinium	Gypsophila paniculata	Physalis
Catananche	Helichrysum	Rhodanthe
Celosia Cristata	Lunaria	Statice
Gomphrena		Xeranthemum

DWARF EDGING PLANTS

Ageratum	Gazania	Pansy
Alyssum	Lobelia	Portulaca
Arabis	Marigold (French)	Pyrethrum aureum
Armeria	Marigold (Signata Pumila)	Verbena compacta
Aubrietia	Myosotis	Viola
Bellis	Nasturtium (Dwarf)	Virginian Stock
Campanula carpatia	Nemesia	Zinnia Tom Thumb
	Nemophila	

SPECIAL USES OF FLOWERS

RAPID GROWING ANNUAL VINES

Balloon Vine	Cypress Vine	Nasturtium (Tall)
Balsam Apple and Pear	Dolichos	Scarlet Runner Beans
Canary Bird Vine	Gourds	Sweet Peas
Cardinal Climber	Ipomea	Wild Cucumber
Cobea	Morning Glory	

ANNUALS FOR FRAGRANCE

Abronia	Matthiola	Stocks
Alyssum	Mignonette	Sweet Peas
Candytuft	Nasturtium (Gleam)	Sweet William
Carnation	Nicotiana	Valeriana
Centaurea imperialis	Petunia	Wallflower
Heliotrope	Scabiosa	

ANNUALS FOR POOR SOIL

Alyssum	Cosmos	Nasturtium
Antirrhinum	Euphorbia	Portulaca
Carthamus	Godetia	Statice
Celosia	Kochia	Ursinia
Chorizanthe	Mesembryanthemum	Venidium
Clarkia		Verbena

ANNUALS WHICH PREFER A LIME SOIL

Amaranthus	Hunnemannia	Stocks
Dianthus	Mignonette	Wallflower
	Momordica	

FOR SEMI SHADE

Anchusa italica	Clarkia	Lupin
Aquilegia	Coleus	Myosotis
Bellis perennis	Geum	Pansy
Campanula	Godetia	Platycodon
Centaurea	Linaria	Sweet William

FOR ROCK GARDENS

Annuals

Abronia	Lobelia	Schizanthus
Alyssum	Marigold Tagetes	Statice Tom Thumb
Anagallis	Mesembryanthemum	Sweet Pea Cupid
Brachycome	Nasturtium Dwarf Gem	Thunbergia
Chorizanthe	Nemesia	Torenia
Dianthus Heddwigi	Nemophila	Ursinia
Dimorphothea	Phlox drummondi	Verbena
Gilia Micrantha	Portulaca	Virginian Stock
Leptosyne	Sanvitalia	Zinnia Tom Thumb
Linaria	Saponaria	Zinnia Haagaena
	Scabiosa Tom Thumb	

FOR ROCK GARDENS

Perennials

Alyssum saxatile	Dianthus	Platycodon
Anthemis Montana	Fragaria	Poppy Nudicaule
Aquilegia	Geum	Potentilla
Arabis	Gypsophila Repens	Primula
Arenaria	Helianthemum	Saponaria Ocymoide-
Armeria	Heuchera	Silene Schafta
Aubrietia	Hypericum	Stachys Lanata
Bellis perennis	Linum	Statice Dumosa
Campanula carpatica	Lychnis	Tunica
Candytuft Semperflorens	Matricaria Eximia	Verbascum Wied.
Cerastium	Myosotis	Verbena Venosa
Cheiranthus	Nepeta	Veronica
Convolvulus mauritanicus	Oenothera macrocarpa	Viola
		Vittadenia
